## Coolfred Software Inc., Releases Fuel Mileage Calculator version 1.1001 for the BlackBerry

Hope Mills, North Carolina, November 2, 2009 – Coolfred Software Inc., announced today the release of the Fuel Mileage Calculator version 1.1011 for the RIM BlackBerry handheld device.

**Calculate your fuel mileage, check trends and get the most out of your vehicle**

**Enter all the data right at the pump, No need to save gas pump receipts for later calculation.**

The Coolfred Fuel Mileage Calculator for the BlackBerry allows you to find out the gas mileage of your car by calculating the distance you have traveled (from past and present odometer readings) and the amount of fuel that was used (gallons of gasoline needed to fill-up\* your tank).

The Coolfred Fuel Mileage Calculator's history screen will allow you to track trends in mileage, cost and fuel consumption that can let you know when a tune up may be needed or that there may be a problem with your vehicle.

Version 1.1011 now offers the ability to import and export data in CSV files that can be easily read into an Excel® spreadsheet for further analysis or modification.

### **Product Availability**

A free trial edition of the Coolfred Fuel Mileage Calculator version 1.1011 for the BlackBerry is available from <http://coolfred.com/blackberry/fuelmileagecalculator>.

\* To accurately calculate fuel mileage you must completely fill your tank each time you get gas.

*The software can also be installed* directly from the BlackBerry device by pointing the BlackBerry web browser to <http://ota.coolfred.com/fmc>.

**About Coolfred Software:** **Coolfred** is a growing software company based in North Carolina. Founded in 1999, we design and create a diverse line of software products.
